PORTFOLIO
<https://indiegabo.github.io/portfolio>

What I do

I build games in C# with Unity. I specialize in 2D, but I am comfortable taking on projects of any shape or scale.

Highlights

- ⚡ 2D and 3D games.
- ⚡ Custom editor windows and tooling with UI Toolkit.
- ⚡ Composition-oriented programming focused on scalable systems.
- ⚡ My web development background helps a lot when building multiplayer experiences.

Tools

Unity

C#

JavaScript

NodeJS

PHP

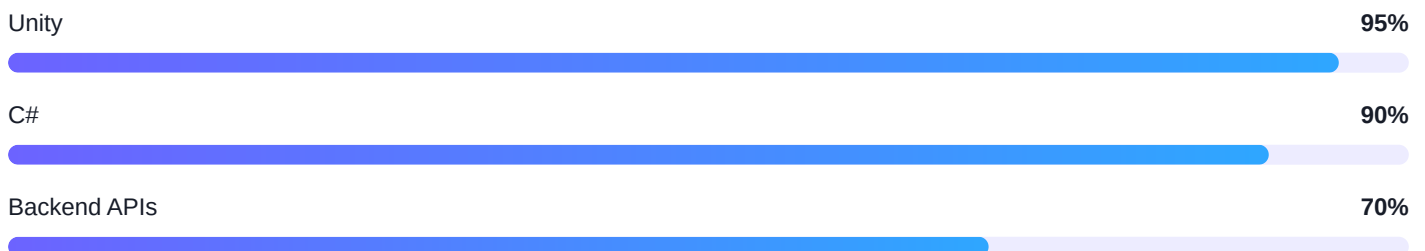

html-5

css3

Databases

docker

Proficiency

Experience

Lead Network Developer Estante Magica

November 2023 - Present

Part-time work on the Magic Land mobile game.

- Responsible for establishing the multiplayer networking layer
- Responsible for the C# HTTP requests flow and structure
- Acts as the glue between Unity and the backend

Lead Developer / Game Designer No Slopes

December 2021 - Present

Responsible for the tooling and features behind the games built by the studio.

Education

Technologist in Internet Applied Systems Universidade Salvador

January 2011 - December 2013

I graduated as a systems analyst focused on internet-based solutions.

- Object-oriented programming
- Databases
- Web development
- Computer architecture

Games I have worked on

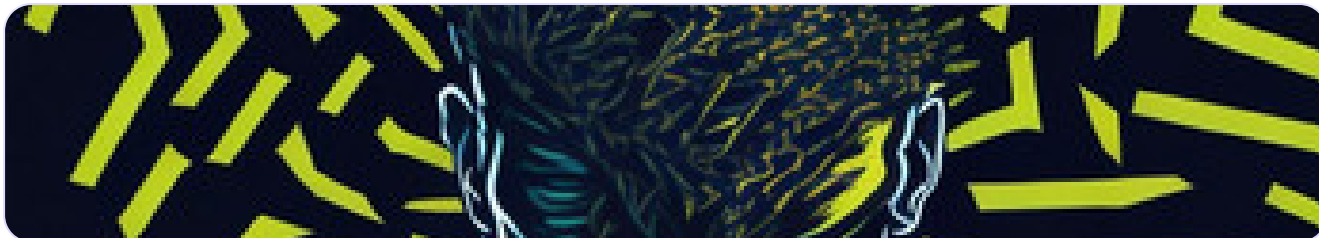

A selection of games where I contributed as a developer or game designer.

Magic Land

[Check it out](#)

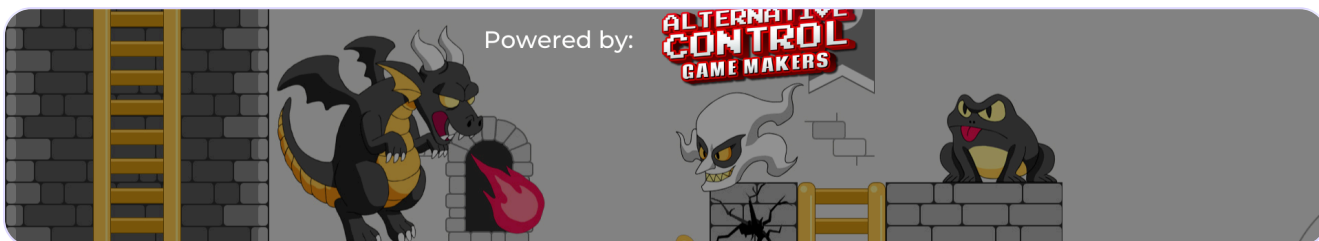

A mobile game made in Unity by the Estante Magica team. I am currently part of the development team, and it is the most robust game project I have worked on so far.

Chasing Illusions

[Play it](#)

A Unity game jam project built around the theme "Illusions". We had the pleasure of winning the jam with this submission.

Boom Boom Castle

[Play it](#)

A Unity game jam project built around the theme "Collateral Effect". Winner in the best theme fit category.

Assets I have created

Tools and assets I built for the community.

Sprite Animations

[Check it out](#)

A smooth and intuitive way to work with sprite sheets in Unity. Free and open source.

Open Source Projects

sprite-animations

[GitHub](#)

A smooth and intuitive way to work with sprite sheets in Unity.

handy-fsm

[GitHub](#)

A handy finite state machine solution for Unity.

ctrl-alt-boo

[GitHub](#)

My contribution to the project.

parallax-tutorial

[GitHub](#)

Repository for the parallax tutorial.

ryzen-sandbox

[GitHub](#)

A 2D platformer sandbox created to study and test Unity's 2D feature set.
